

## Fenton Foot Care

Fenton Foot Care is on the move in 2012, relocating its practice to a new location, as well as expanding with the addition of a new associate doctor.

Fenton Foot Care has been serving patients in the tri-county area with medical and surgical treatment of the foot and ankle for more than 30 years. In addition to the treatment of heel pain, heel spurs, ingrown toenails, warts, fungus and wound care, James Hirt, DPM devotes much of his practice to diabetic foot care. "We have a large selection of custom diabetic shoes and over the counter products," said Hirt.

Fenton Foot Care also offers the highest level of today's podiatric technology, from digital X-rays to diagnostic ultrasound and on-site vascular testing. "With our new equipment, we are able to diagnose vascular problems before they escalate into potential foot wounds heart disease and strokes," said Hirt.

Patients can also utilize the technology at Fenton Foot Care through the Patient Portal — secure on-line access for patients to view their medical records, request appointments, medication refills and send

practice messages.

Fenton Foot Care will move its practice on March 1, 2012 to 14229 Torrey Rd. in Fenton, the former location of Professional Insurance. The practice's current location is at 205 Lincoln St., just off Silver Lake Rd. in Fenton.

"We are excited about having the ability to better serve our patients with a larger office space," said Hirt. "This new office suite is actually twice the size of our current practice. Our new office will provide between six and eight patient rooms, a more spacious office setting, and the ability to add the services of a new doctor, as well as additional staff."

The current practice, managed by Stephanie Junga, includes nine employees and more staff will likely be added.

Fenton Foot Care is pleased to announce that a new associate doctor will join the practice on July 1, 2012. Dr. Seth Felice, who completed his residency at St. John Hospital and Medical Center in Detroit, Dr. Felice has advanced training in medical and surgical treatment of the foot and ankle, as well as wound care.
